Contents

1	Introduction	2
1.1	Applications of the SEM	2
1.2	Theories of the SEM	2
1.3	How Fast Computing Can Aid SEM Operators	2
2	The Algorithms	2
2.1	Histogram Equalisation	2
2.2	Fast Fourier Transform	2
2.3	Focusing and Astigmatism Correction	2
3	The Software	2
3.1	Overview	2
3.2	The SemImage Module	2
3.3	The SemTool Module	2
3.4	The SemCorrector Module	2
4	Demonstrations	2
4.1	Real-time Histogram Equalisation	2
4.2	Real-time Fast Fourier Transform	2
4.3	Automatic Focusing and Astigmatism Correction	2
5	Next Steps	2

1 Introduction

1.1 Applications of the SEM

1.2 Theories of the SEM

1.3 How Fast Computing Can Aid SEM Operators

2 The Algorithms

2.1 Histogram Equalisation

2.2 Fast Fourier Transform

2.3 Focusing and Astigmatism Correction

3 The Software

3.1 Overview

3.2 The SemImage Module

3.3 The SemTool Module

3.4 The SemCorrector Module

4 Demonstrations

4.1 Real-time Histogram Equalisation

4.2 Real-time Fast Fourier Transform

4.3 Automatic Focusing and Astigmatism Correction

5 Next Steps
