#### 1 Introduction

- 1.1 Project Objectives
- 1.2 Applications of the SEM
- 1.3 Theory of the SEM
- 1.4 How Fast Computing Can Aid SEM Operators
- 2 The Algorithms
- 2.1 Histogram Equalisation
- 2.2 Fast Fourier Transform
- 2.3 Focusing and Astigmatism Correction
- 3 The Software
- 3.1 Overview
- 3.2 The SemImage Module
- 3.3 The SemTool Module
- 3.4 The SemCorrector Module
- 4 Demonstrations
- 4.1 Real-time Histogram Equalisation
- 4.2 Real-time Fast Fourier Transform
- 4.3 Automatic Focusing and Astigmatism Correction
- 5 Next Steps
